Our Services

Forex Trading

Forex is a portmanteau of foreign currency and exchange. Foreign exchange is the process of changing one currency into another currency for a variety of reasons, usually for commerce, trading, or tourism. According to a recent triennial report from the Bank for International Settlements (a global bank for national central banks), the average was more than \$5.1 trillion in daily forex trading volume. Because of the worldwide reach of trade, commerce, and finance, forex markets tend to be the largest and most liquid asset markets in the world. Market participants use forex to hedge against international currency and interest rate risk, to speculate on geopolitical events, and to diversify portfolios, among several other reasons.

Real Estate

Real estate investment involves the purchase, ownership, management, rental and/or sale of real estate for profit. Improvement of realty property as part of a real estate investment strategy is generally considered to be a sub-specialty of real estate investing called real estate development. Real estate is an asset form with limited liquidity relative to other investments (such as stocks or bonds that openly trade on financial markets). It is also capital intensive (although capital may be gained through mortgage leverage) and is highly cash flow dependent. If these factors are not well understood and managed by the investor, real estate becomes a risky investment.

Cannabis

For many years we have been working conscientiously and with the most diverse technologies and means. We have constantly successfully completed our projects. We believe that the full benefits and potential of cannabis as a medical therapy are within our reach only through supply chain transparency, an engaged and active network of cannabis users, and data that is consistently available and verifiable for medical surveys and for developing and establishing therapies and life-prolonging solutions and treatments on blockchain technology. Our vision is one in which cannabis medical research gets the support it needs and deserves.

Cannabis Goals

Understand the regulatory, legal, and technological needs and challenges of the medical cannabis industry

Continually advance the medical cannabis blockchain data ecosystem to medical studies

Establish strong vendor and partner relationships with technology firms, doctors, scientists, universities, and governments to ensure data integrity and value

Attract, hire, and retain highly qualified professionals to sell, manage, monitor, and service the various technological component parts and software systems required to support the ecosystem

Foster a social community online in which each member can participate freely and offer the breadth of their knowledge and experience

Provide a simple, secure, user-friendly global exchange platform for the stakeholders

Create billions of data points and hundreds of millions of dollars in transaction value

Establish supply-chain integrity

Cryptocurrency

Growthaffairm now offers all traders the opportunity to trade a wide range of the top ranked digital coins 24/7*. Today cryptocurrencies have become known to most people as a conventional and popular investment option. The main purpose of this new technology is to allow people to buy, trade, and invest without the need for banks or any other financial institution. Cryptocurrencies are highly volatile and can be profitable to any trader's portfolio. Cryptocurrencies are not physical coins they are electronic, a digital asset that remains as data. The technology behind the cryptocurrency controls a large part of its value which holds new technology on the secure way to identify and transfer money. The first digital coin introduced was the Bitcoin and today it remains as the standard that all other coins compare themselves to. Following in its steps came Litecoin, so to date they stand as the top 2 highly valued coins on the market. There are several other coins also reaching a high-level market share such as Bitcoin and Bitcoin Cash, Dash, Ripple, Ethereum and Ethereum

Gold Investments

Commonly seen as a great store of wealth, this precious metal is also known as a reliable safe-haven asset. With a rich history amongst almost all global cultures, gold remains a highly popular investment. Although it has multiple uses, its primary function is typically to hedge against inflation in an often volatile futures market, as well as to diversify existing Precious Metals Investment Retirement Accounts. Gold has been one of the most valuable precious metals throughout human history, used by elites as a symbol of wealth for centuries due to its rarity and its ability to hold its worth for a long time. Historically, it has been the most common way to pass on one's wealth as an inheritance from one generation to the next. Gold is considered a worthy investment, with coins and bars available for purchase in various sizes, ranging from one gram to a whopping 400 ounces. Being the most reliable investment commodity available, gold has proven to be a perfect way to diversify your investment portfolio and an excellent safeguard against volatile currency.

Retirement Services

Saving for retirement can be a daunting task, but with a sound strategy, it's well within reach. Growthaffairm is here to bring clarity to retirement planning and set you on your path to success. Here you'll better understand your options and find the right investment. If you had the chance to double—or even quadruple—your retirement savings, you'd probably jump at that opportunity, right? Well, there's one simple change you can make today that's sure to boost your retirement savings. Growthaffairm study of worldwide retirement saving habits discovered that people with some kind of retirement plan have more than three times as much in their nest egg than those with no plan at all. And savers who take it one step further by working with an investing advisor to put their plan to paper? Their average nest egg is a whopping 445% bigger than non-planners. That's a big deal! Now, did you catch that? By working with an advisor and by having a plan in place, you can supercharge your retirement savings.

Financial Planning

A financial plan is a comprehensive evaluation of an investor's current and future financial state by using currently known variables to predict future cash flows, asset values and withdrawal plans. Most individuals work in conjunction with their preferred financial planner and use current net worth, tax liabilities, asset allocation, and future retirement and estate plans in developing financial plans. These metrics are used along with estimates of asset growth to determine if a person's financial goals can be met in the future, or what steps need to be taken to ensure that they are.

Oil and Gas

To trade in oil online using CFDs it is strongly recommended to use data from both technical and fundamental analysis. Your technical analysis can be completed using comprehensive customised charts that are available through your broker on the trading platform upon which you can display different indicators. Concerning fundamental analysis, this consists of monitoring and analysing the factors and exterior events that may influence the oil price. These of course include data on the supply and demand of oil throughout the world as well as other indicators. For example, the American oil stocks are carefully monitored by traders. You will find them each week in the economic calendar as they are published every Wednesday. These stocks give you concrete information on the demand and consumer levels of oil. Large stocks have a tendency to lower the price of oil and vice versa. Finally, the U.S. Dollar rate can also influence the oil price as an advantageous exchange rate can encourage buyers to invest in the commodity which is quoted in this currency.

Loan and Grants

Getting a loan doesn't have to be intimidating, with the right lender it can be a simple process. You only need a lender committed to taking the mystery out of the mortgage loan process! At Growthaffairm, we understand! Our investors want simple facts, honest answers and competitive products. DGS automatically offers loan services to investors with over \$50,000 investment either in our normal Growthaffairm financial Services packages or the NFP plans. Investors over \$50,000 are entitled to loans of \$200,000-1million dollars yearly with 5% paid monthly, or the investor could wish to compound the interest till the time limit, provided all required information and identity of the investor are duly confirmed by Growthaffairm loan board. Every investor above \$50,000 is provided with a personal account manager and the investor has a direct communication with the manager in order to see that our loan offers are secured. GREAT INVESTING WITH Growthaffairm FAMILY
